

NOTES AND INSTRUCTIONS ON THE NEW SYSTEM OF COMMUNICATION 4/15/81

1. P.O.O. initialed PS 02 [ ] YES [ ] NO { PS 02 is the predecessor to PS 03; before TC's are assigned and/or carried out P.O.O. must initialize PS 02; in other words P.O.O. is PS 02's successor and PS 02 is the predecessor to PS 03 }
2. S.A. & M.S.A. { S.A. & M.S.A. relates to the general classes on PS 01; in other words, the formulation of S.A. & M.S.A. possess the general form of classes on the PS 01. The actual statement of content of the S.A. & M.S.A. must always reflect the particularity of contrad.. that one is working with.
3. TC { The TC from PS 02 is to be entered here }
4. { PREDECESSORS } { predecessors from TC of PS 02 are to be entered here }
5. Who  $\alpha\kappa$  { The person's programmatic #is to be entered here.  $\alpha\kappa$  means the C of K :  $P-G \wedge G-P$ . Enter either [01] for  $\alpha\kappa P-G$  to indicate the metaphy. knowledge form (KF) and [02]  $\kappa\alpha G-P$  to indicate the Idist KF. In the course of any process account must be taken for the 2 incompleated KF's . Not to do so will set a condition to cause very serious problems of unsystematicness/ decay [02] and lack of communication/disorganization in connection to [01].
6. DUR. { At present the computerized PS system can only calulate days. Effort is now being made to convert days into hrs. and hrs. into minutes. The PS 02 must indicate only days. The data on PS 02, not PS-03, is the data that will be put into the computer. On the other hand, when necessary days, hrs., and minutes can be used to indicate DUR on the PS03.}
7. EARLY START TIME, LATE START TIME, EARLY FINISH TIME, & LATE FINISH TIME {PS 02 will be initialized by returning the computerized PS02. The print out of PS 02 will give the dates of EST, LST, EFT, & LFT. The dates can then be used to fill in PS 03. The print out of PS 02 will serve as a guide to making necessary changes on the EST ---LFT }
8.  $\bar{\Sigma}$  {  $\bar{\Sigma}$  this means incompletions. All reasons for  $\bar{\Sigma}$  will be given on a different printed form. Make a check mark for all incompletions }
9. New TC  $\wedge$  Assignment { in the course of practice to either transform objective reality into subjective relaiety or vice versal, practice must be changed to deal with the variability (ies) of reality. The New TC: a) use it to recalculate EST for the rest of the TC's that succeeds the new TC: b) make the notation of the new TC on PS 02.
10. NOTES: 1. make sure that all predecessors have been written down in print. 2. No predecessor can be a predecessor to itself. 3. Check to make sure your PS 02 doesn't have mistakes and errors.
