

6/12/81

To: Developing ML cadres

From: P.O.O.

Since the introduction of the PSSC, there has been a noticeable drop in useless correspondence. There is still ways to go in practice before a complete categorization of things is achieved. Up until now in the use of the PSSC, P.O.O. has only initial 3 PS02's. This was for organizational reasons. On the other hand, the basic reason for not doing so was to allow cadres time to align their practice with the PSSC. There is always a quantity of incompletions, inaccuracies, and misplacements of information in the initial stages of a new process to realign conceptual thinking..This is the conceptual basis for not initialing the PS02's.

There was a feature criticism brought out in C.L.'s memo dated 5/5/81 which states: "in this connection,  $\alpha\kappa$  and  $\kappa\alpha$  are presently reflected in the use of the PSSC forms. For instance, the PS02 give a reflection of a principal contradiction every week and every month". To increase the clarity of this ideological criticism, in given situations there are new principal contradictions occurring daily, weekly, and monthly. However, the focus of this ideological criticism is based on the fact that there is no dialectical material evidence of the resolution of PC's occurring weekly or monthly. Of course, this criticism doesn't apply to the organization as a whole. Nevertheless, undialectical material practices perpetuate mechanical correspondence, thereby wasting ~~and~~ time and money. Thus the PSSC will fundamentally make mechanical correspondence impossible.

The definitions of PS01 will enable developing cadres to conceptualize the overall process of a thing. But most importantly is will enable developing cadres to understand problems of the primary and of the secondary contradictions.

The worksheet is part of the PSSC. Discussion groups will be organized around the worksheet.

NOTE: the Work Breakdown Structure Input Data form PS02 is the connecting form for PS 02 to be initialed. Before the connection is made with WBSID, the PS01 & PS02 must be reviewed by P.O.O. to ascertain the degree of correctness. This step is part of the process of initializing the PS02. As the ITP continues to develop, idealism and meta-physics will be defeated as a force within the O by the DM method and scientific social practice.
