RE: THE USE OF NETWORK IN THE PSSC

The concept network building is now being introduced as part of the PSSC. The use of network isn't new for some programs for they use them as a routine practice before using WBSIPD or WBID. The use of this step to format one's or the program's activities have great rewards e.g. miscalculation can be easily be retracible, it is a visual aid in conceptualization of sets, and its basic order of procedure is sequential dependency--successors.

THE BASIC RULE IN SET COMPOSITION: "BEFORE AN ACTIVITY MAY BEGIN, ALL ACTIVITIES PRECEDING IT MUST BE COMPLETED".

ACTIVITY NUMBER	DURATION	WHO	
SCHEDULED	DESCRIPTION	SCHEDULED	
START DATE		FINISH DATE	
ACTUAL		ACTUAL	
START DATE		FINISH DATE	
EARLY START	LATE START	EARLY FINISH	LATE FINS
TIME	TIME	TIME	TIME"
EARLY START	LATE START	EARLY FINISH	LATE FINS
DATE	DATE	DATE	DATE
